### OBJECTIVE

To pursue a respectful job in a reputed organisation where I can utilize my technical and practical knowledge to fulfil the requirements of the organisation and perform very well with challenges came across me during the work by satisfying the policies of the organisation.

### ACADEMIC PROJECTS

#### Student verification system

Student verification system is used to know whether or not a student is or was a legal and rightly registered student. In this context, it is used to verify that a student belongs to an institution and to confirm that he/she is properly registered in a particular department running any of the institutions program.

#### Online Housemaid System

Developed a web-based platform connecting households with available housemaids, enabling easy search, booking, and management of services. I was responsible for designing and implementing the user interface (UI) using HTML, CSS, and JavaScript
