Marathi

ACADEMIC PROJECTS

Student Verification System

Student verification system is used to know whether or not a student is or was a legal and rightly registered student. In this context, it is used to verify that a student belongs to an institution and to confirm that he/she is properly registered in a particular department running any of the institutions program.

Online Housemaid System

Developed a web-based platform connecting households with available housemaids, enabling easy search, booking, and management of services. I was responsible for designing and implementing the user interface (UI) using HTML, CSS, and JavaScript.

Portfolio Website
